PROFESSIONAL SUMMARY

Senior Software Engineer and Database Specialist with 9+ years of experience in mission-critical enterprise environments (Finance, Government). Currently leveraging a deep foundation in SQL Server, C#, and .NET to build production-grade AI agentic systems and automation workflows. Expert at bridging the gap between legacy data reliability and modern intelligent automation.

CORE COMPETENCIES

AI Agentic Workflows

LLM Integration

Python Automation

SQL Server AlwaysOn

Performance Tuning

C# / .NET Core

ETL / SSIS

AWS RDS & Beanstalk

WORK EXPERIENCE

KinderSystems

Oct 2024 - Present

Database Developer II

Remote, Washington

- ETL Ownership:** Maintains and enhances complex ETL pipelines, SSIS packages, and SQL Agent Jobs for a multi-tenant SaaS platform serving government agencies.
- Reliability:** Coordinates and validates Disaster Recovery (DR) failover sequences, ensuring data continuity across environment switches.
- Performance:** Diagnoses and resolves complex data and query performance issues in production environments.
- Stakeholder Communication:** Bridges technical implementation and business value for state agency clients.

State Employees Credit Union

Aug 2019 - Nov 2023

Software Engineer II

Raleigh, NC

- High Availability:** Managed SQL Server Always On Availability Groups supporting a top-10 US credit union's core financial operations.
- Lifecycle Management:** Led the transition from Bugzilla to Jira and architected a comprehensive SDLC for facility projects.
- Automation:** Developed SQL Agent Jobs and PowerShell automation for mission-critical financial workflows and API integrations.

Public Consulting Group

Jun 2015 - Aug 2019

Software Engineer II

Blacksburg, VA

- Enterprise Delivery:** Led full software lifecycle from requirements analysis to enterprise-wide deployment for high-scale public sector clients.
- Optimization:** Developed complex SQL maintenance scripts and optimized stored procedures, improving retrieval efficiency.

TECHNICAL PROJECTS

Prosite | Modern TypeScript Architecture TypeScript / AI

Modernized professional presence using AI-augmented workflows and TypeScript architecture. Focused on high-signal technical narratives and career mapping.

TypeScript, Next.js, AI Workflows

WoW Addon Manager (WAM) Python / CLI

Open-source Python CLI tool for managing addons on Linux. Integrates CurseForge and GitHub APIs with a dual-layered management system.

Python, API Integration, Linux

Cloud-Deployed ASP.NET Site Full Stack / AWS

Full-stack personal site built in ASP.NET Core with a two-stage database lifecycle: local SQL Server dev to AWS RDS production migration.

C#, ASP.NET Core, AWS RDS, Elastic Beanstalk

EDUCATION

Bachelor of Science in Computer Science

Salem, VA

Roanoke College

PERSONAL & ENVIRONMENT

Linux Daily Driver

Fedora/Bazzite

Self-Built Systems

Hardware & Low-level config

TECHNICAL SKILLS

AI/Automation: Agentic Workflows, LLM Integration, Python, PowerShell Software: C#, .NET Core, TypeScript, API Integration, Git, SDLC

Database: SQL Server (AlwaysOn), T-SQL, Performance Tuning, SSIS, ETL, AWS RDS
